

Panel Collection

Carved, flexible & acoustic panels and decorative screens

Hudson Valley CNC · 30 Crispell Lane, Gardiner, NY · 845-384-2994

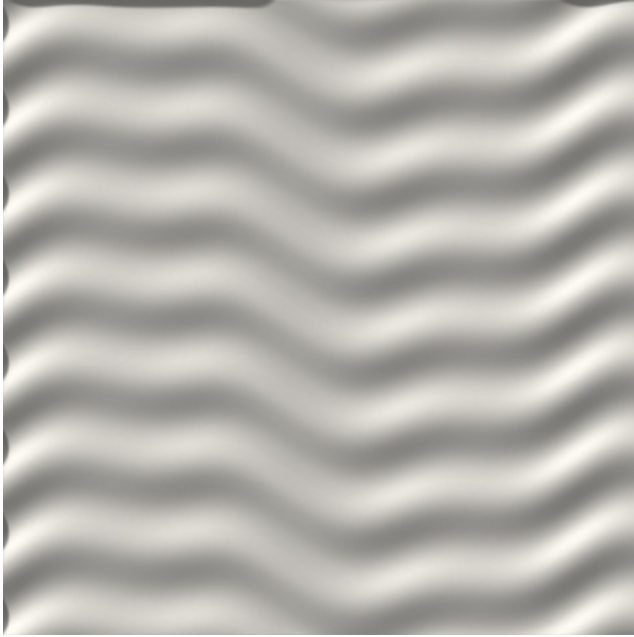

Made to order in the Hudson Valley

Every panel in this catalog is cut to order on our 5' × 10' industrial CNC router in Gardiner, NY. Pick a pattern, then tell us the size, material and finish. Every design can be scaled, rotated, made deeper or shallower, or run seamlessly across several panels to cover a whole wall. Don't see what you want? We'll design a custom pattern, or match a sample or photo.

Panel sizes	Standard 4' × 8' sheets, or single panels up to 5' × 10' with no seams. Any custom size, cut to fit your wall.
Thickness	1/2" to 1-1/2". Most carved designs are cut in 3/4" stock; deeper designs use 1" or thicker.
Materials	MDF (standard, moisture-resistant, no-added-formaldehyde, fire-rated), Baltic birch and hardwood plywood, solid hardwoods, bamboo plywood, PVC board, HDU, acrylic and HPL.
Finishes	Raw for your painter, primed, painted to any color, stained, or clear-coated. Screens can be backlit.
Flexible	Kerf-cut and tambour panels bend around columns, curved walls and desks.
Acoustic	Slotted and perforated designs can be backed with acoustic felt or mineral wool to absorb sound.
Install	Panels are delivered ready to mount with French cleats, construction adhesive or a Z-clip system. Installation can be arranged.

How to order

1. Choose a design code (for example HV-W01) and material.
2. Send your wall dimensions or drawings. Photos with a tape measure work too.
3. We send a quote and a layout showing how the pattern falls across your panels.
4. We cut and finish your panels, and you pick up or we deliver.

WAVE

Hudson

HV-W01

Long, slow horizontal swells that drift like the river on a calm day. Reads beautifully under grazing light in lobbies and long corridors.

Shown in Paint-grade MDF, primed white

Depth up to 3/8"

Tooling 1/2" ball nose, 3D finishing pass

WAVE

Ridgeline

HV-W02

Stepped topographic terraces inspired by the Shawangunk and Catskill ridges. Each contour is a flat pocket, so it machines quickly and crisply.

Shown in White oak

Depth 6 terraces, to 1/2"

Tooling 1/4" end mill, stepped pockets

WAVE

Ripple

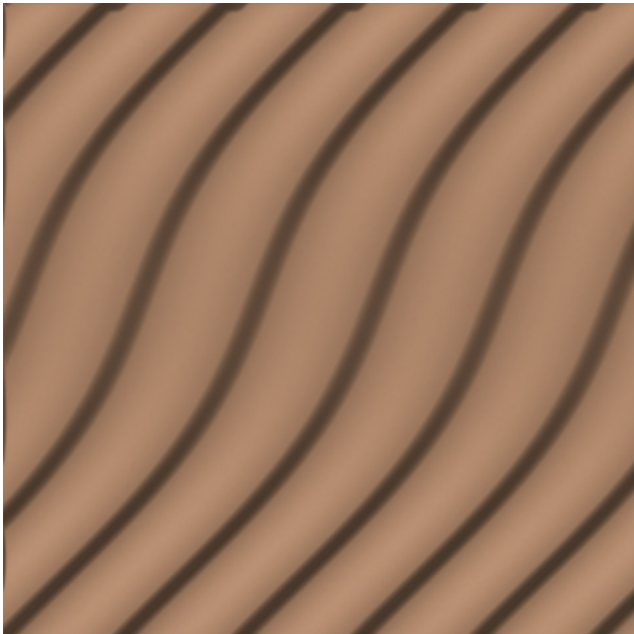

HV-W03

Concentric rings spreading from an off-center point, like a stone dropped in still water. Great as a single feature wall.

Shown in Paint-grade MDF, primed white

Depth up to 5/16"

Tooling 1/2" ball nose, 3D finishing pass

WAVE

Dune

HV-W04

Asymmetric diagonal ridges with a soft windward slope and a sharper lee edge, like wind-shaped sand.

Shown in MDF, painted clay

Depth up to 3/8"

Tooling 1/2" ball nose, 3D finishing pass

WAVE

Tide

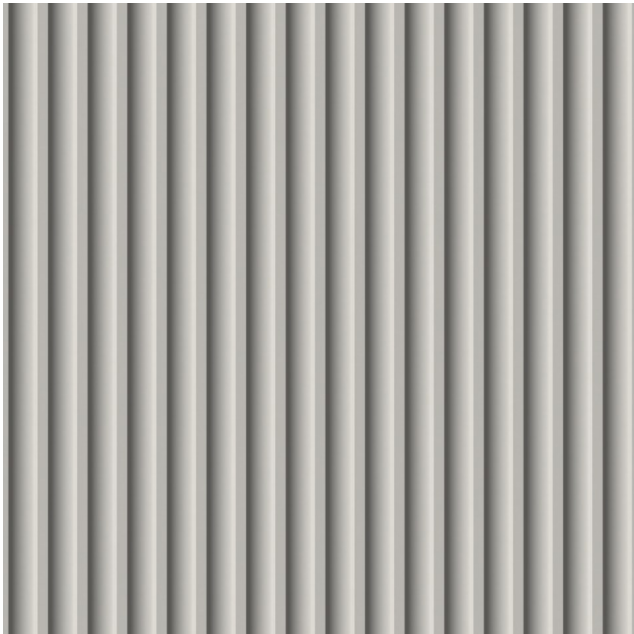

HV-W05

Two wave fields crossing at a shallow angle, creating a soft interference pattern like overlapping wakes.

Shown in Paint-grade MDF, primed white

Depth up to 5/16"

Tooling 1/2" ball nose, 3D finishing pass

FLUTED & RIBBED

Colonnade

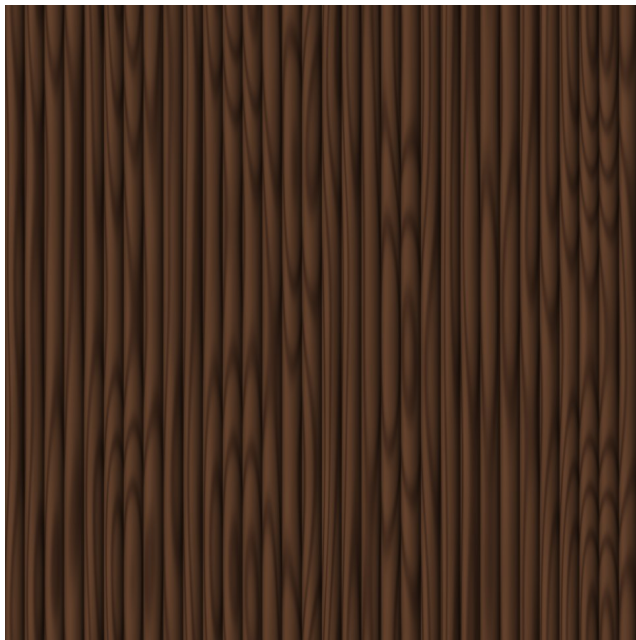

HV-F01

Classic concave vertical flutes on a 1-1/2" spacing. Timeless on reception desks, columns, bar fronts and feature walls.

Shown in Paint-grade MDF, primed white

Depth 5/16"

Tooling 1" core-box / ball nose

FLUTED & RIBBED

Reed

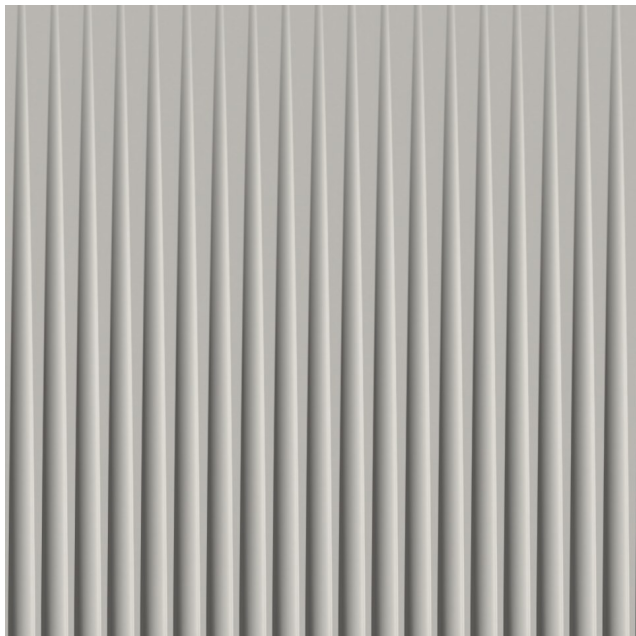

HV-F02

Fine convex reeding on a 3/4" pitch. Adds rich texture to cabinet-style fronts, doors, island panels and headboards.

Shown in Walnut veneer / solid walnut

Depth 3/16"

Tooling 3/4" round-over / bullnose profile pass

FLUTED & RIBBED

Fade

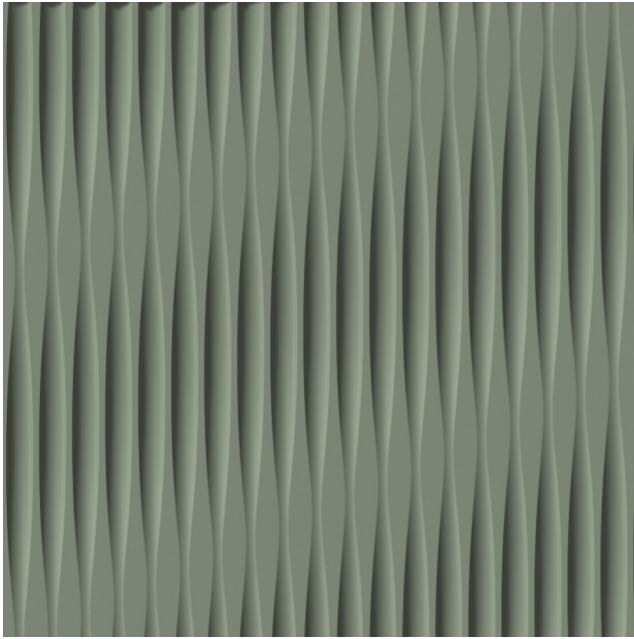

HV-F03

Flutes that grow from nothing at the top to full depth at the bottom, a subtle gradient that makes a wall feel taller.

Shown in Paint-grade MDF, primed white

Depth 0 to 3/8"

Tooling 3/4" ball nose, ramped depth

FLUTED & RIBBED

Undulate

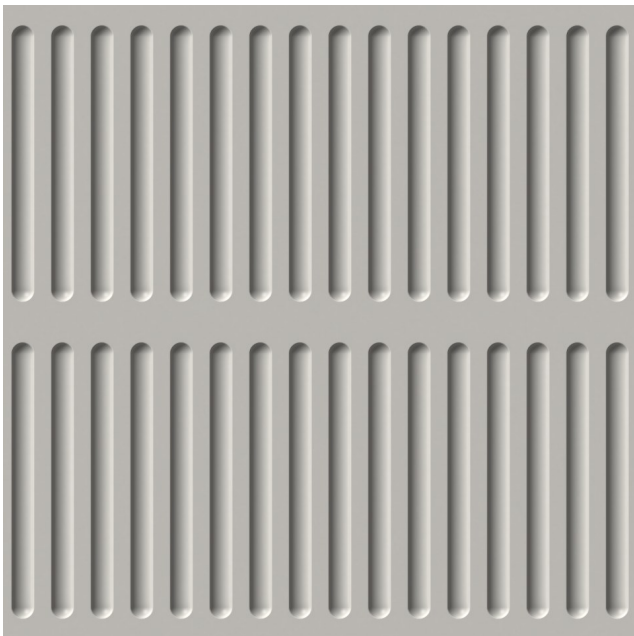

HV-F04

Vertical flutes whose depth swells and relaxes in a slow wave across the panel. Flutes and waves in one.

Shown in MDF, painted sage

Depth 1/16" to 3/8"

Tooling 3/4" ball nose, variable depth

FLUTED & RIBBED

Stopped Flute

HV-F05

Traditional stopped fluting with rounded ends, as on classical pilasters. Perfect for columns, door casings and mantels.

Shown in Paint-grade MDF, primed white

Depth 1/4"

Tooling 3/4" ball nose, plunge-and-ramp

CLASSIC CARVED

Shiplap

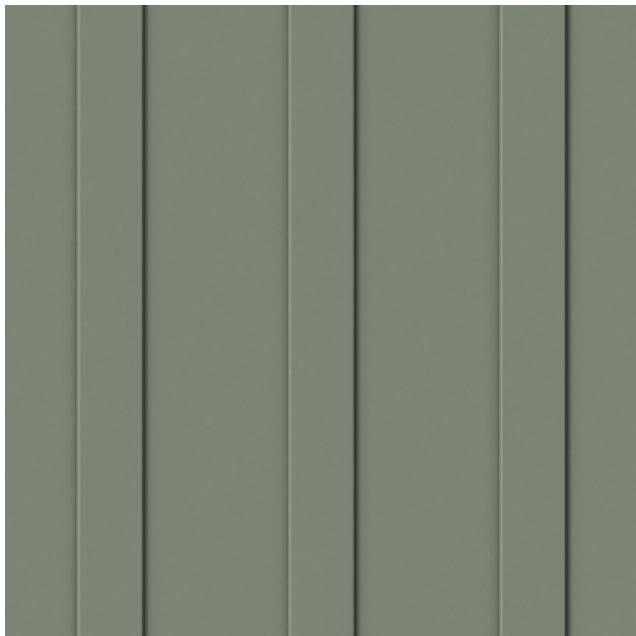

HV-C01

Clean horizontal V-grooves that give the look of shiplap or nickel-gap boards in a single flat, stable panel.

Shown in Paint-grade MDF, primed white

Depth 1/8"

Tooling 90° V-bit, straight passes

CLASSIC CARVED

Board & Batten

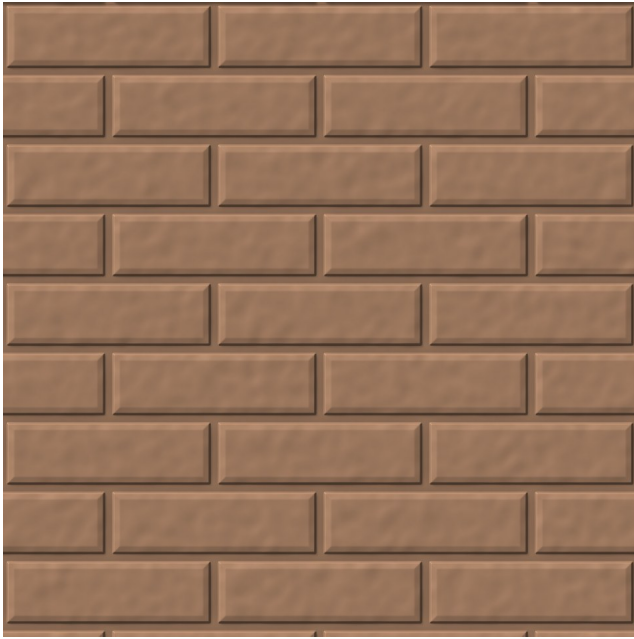

HV-C02

Raised battens over flat boards, carved from one sheet so there are no seams to open up. Farmhouse to modern.

Shown in MDF, painted sage

Depth 1/4"

Tooling 1/2" end mill pocket + round-over

CLASSIC CARVED

Brick

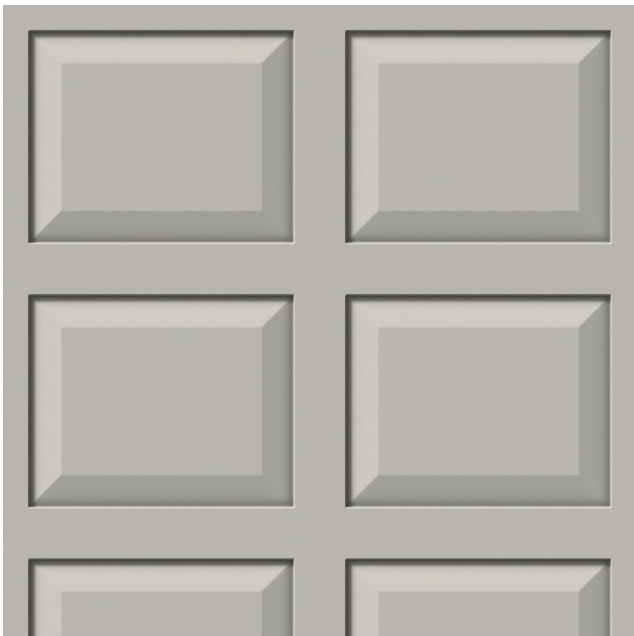

HV-C03

Running-bond brick with rounded, slightly irregular faces. Lightweight faux brick for accent walls and fireplaces.

Shown in MDF, painted clay

Depth 3/16"

Tooling 1/4" ball nose + V-bit mortar lines

CLASSIC CARVED

Wainscot

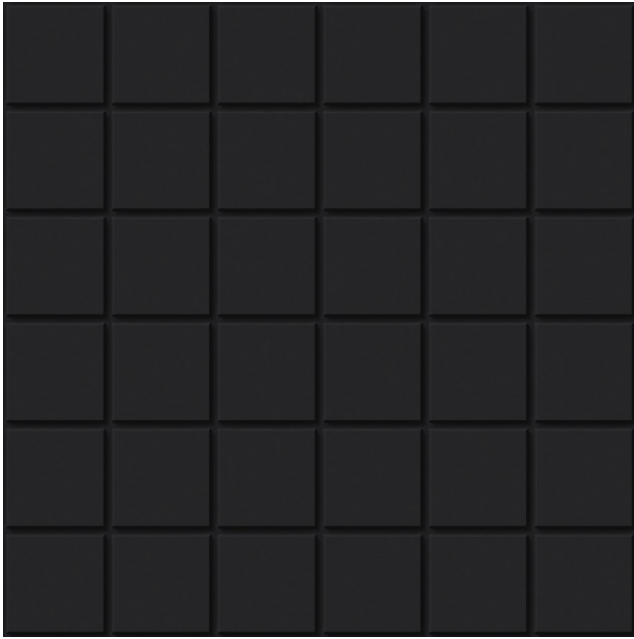

HV-C04

Raised-panel wainscot with beveled fields, carved from one sheet for paneled dining rooms, stair walls and cabinetry ends.

Shown in Paint-grade MDF, primed white

Depth 3/8"

Tooling 15° panel-raising bit or 3D bevel pass

CLASSIC CARVED

Coffer Grid

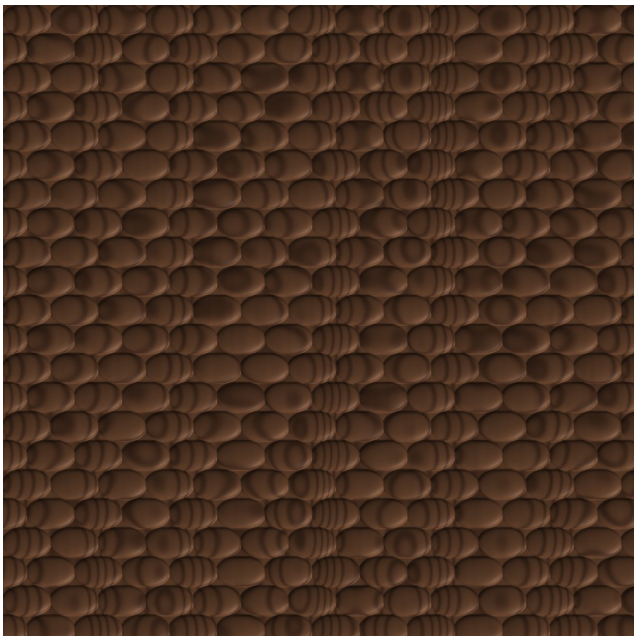

HV-C05

A crisp grid of square-bottom grooves. Simple, architectural, and easy to align across full walls or ceilings.

Shown in MDF, matte black finish

Depth 1/4"

Tooling 1/4" end mill, straight passes

GOUGED & TEXTURED

Adze

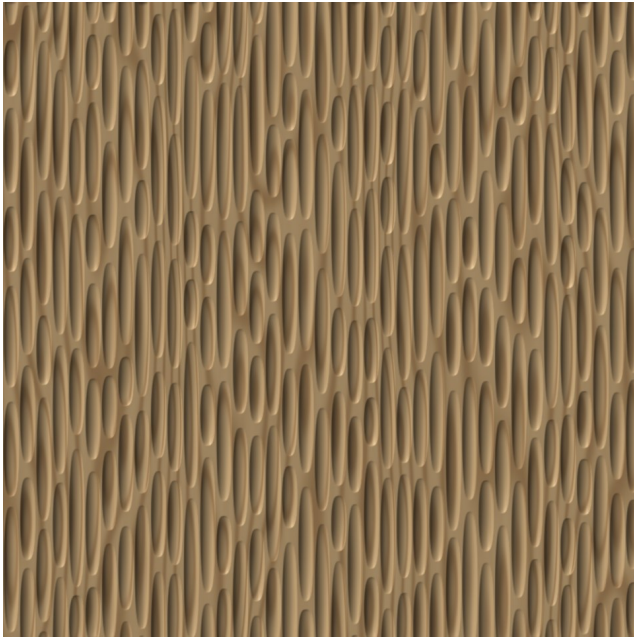

HV-T01

Staggered scoop marks like a hand-hewn beam, cut with a ball-nose tool for a hand-tooled look at production speed.

Shown in Walnut veneer / solid walnut

Depth 3/16"

Tooling 1" ball nose, scoop toolpaths

GOUGED & TEXTURED

Chisel

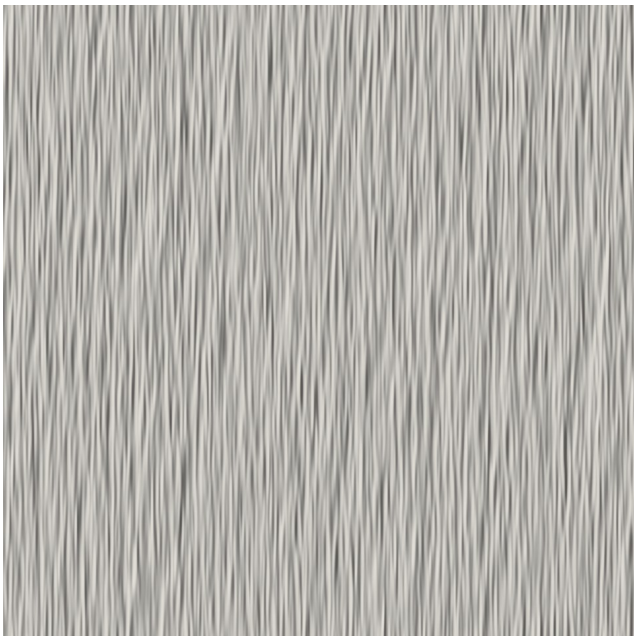

HV-T02

Random-length vertical gouge strokes with tapered ends. Organic, warm and different on every panel.

Shown in White oak

Depth 3/16"

Tooling 1/2" ball nose, ramped strokes

GOUGED & TEXTURED

Birch Bark

HV-T03

An irregular vertical texture with the stretched, layered feel of bark. Hides fingerprints and wear in busy spaces.

Shown in Paint-grade MDF, primed white

Depth 1/8"

Tooling 1/4" ball nose, 3D raster

GOUGED & TEXTURED

Hammered

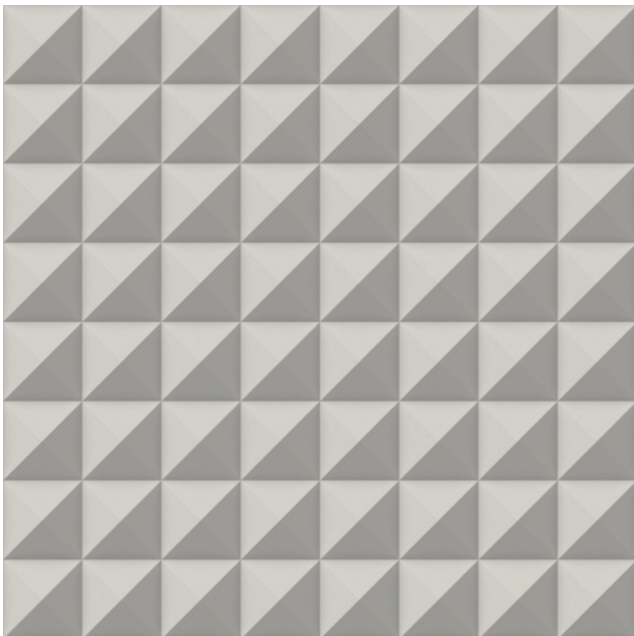

HV-T04

Overlapping shallow dimples on a hex grid, like hand-hammered metal, cut in wood or MDF. Stunning in matte black.

Shown in MDF, matte black finish

Depth 1/8"

Tooling 3/4" ball nose, plunge pattern

DIMENSIONAL

Pyramid

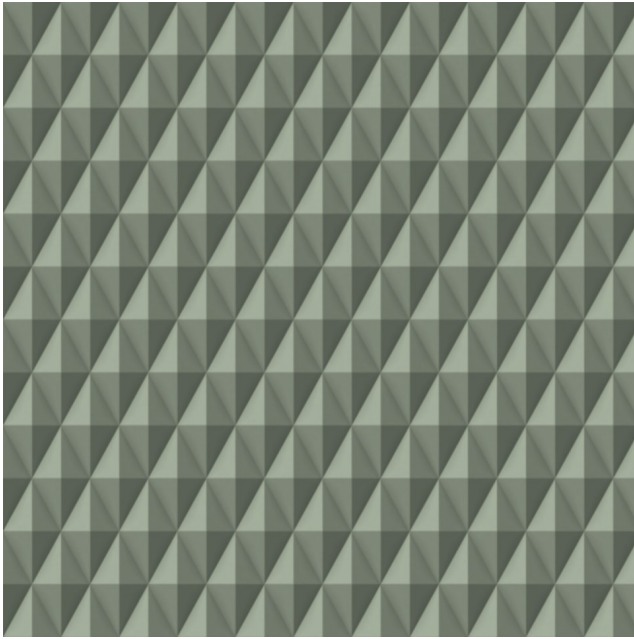

HV-G01

A grid of crisp four-sided pyramids cut with a V-bit. Bold shadows that change all day as the light moves.

Shown in Paint-grade MDF, primed white

Depth 3/8"

Tooling 90° V-bit, V-carve

DIMENSIONAL

Facet

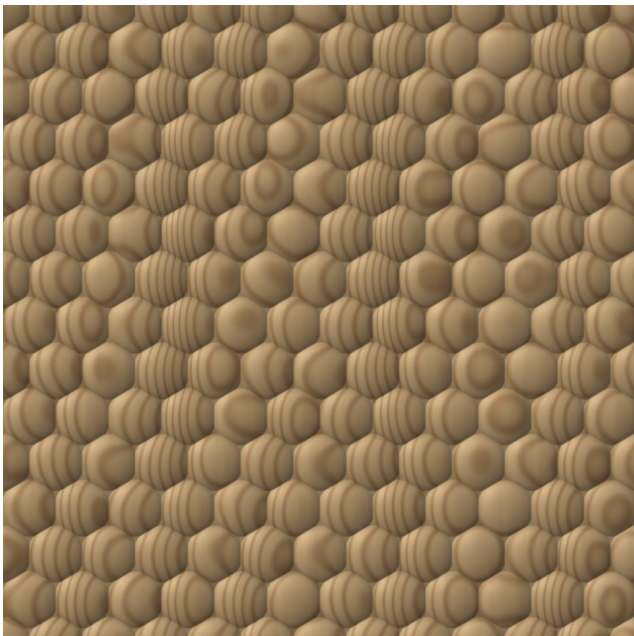

HV-G02

Elongated diamond facets, like a cut gemstone stretched tall. Sharp, architectural and easy to scale up or down.

Shown in MDF, painted sage

Depth 5/16"

Tooling 120° V-bit, V-carve

DIMENSIONAL

Hex Dome

HV-G03

Softly domed hexagon tiles with a crisp V-groove between each one. Warm and tactile, like a honeycomb.

Shown in White oak

Depth 1/4"

Tooling 1/2" ball nose + 90° V-bit

DIMENSIONAL

Chevron

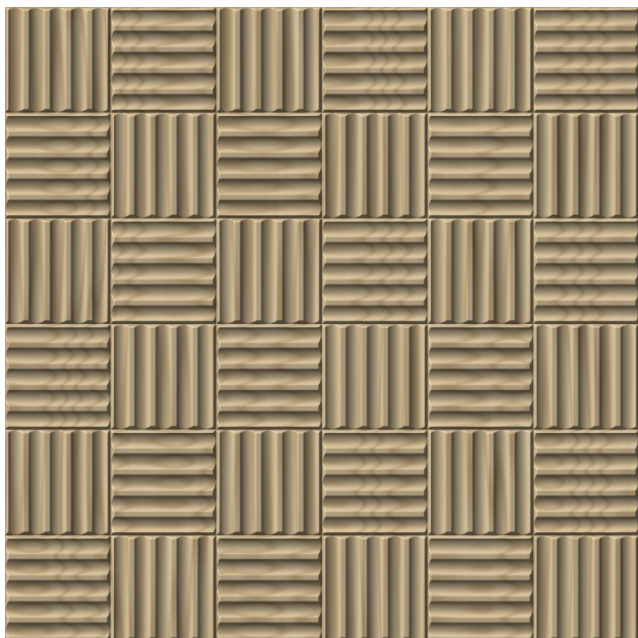

HV-G04

Nested V-groove chevrons that point the eye upward. A strong graphic statement for bars, restaurants and retail.

Shown in Walnut veneer / solid walnut

Depth 1/4"

Tooling 90° V-bit, V-carve

DIMENSIONAL

Basket Weave

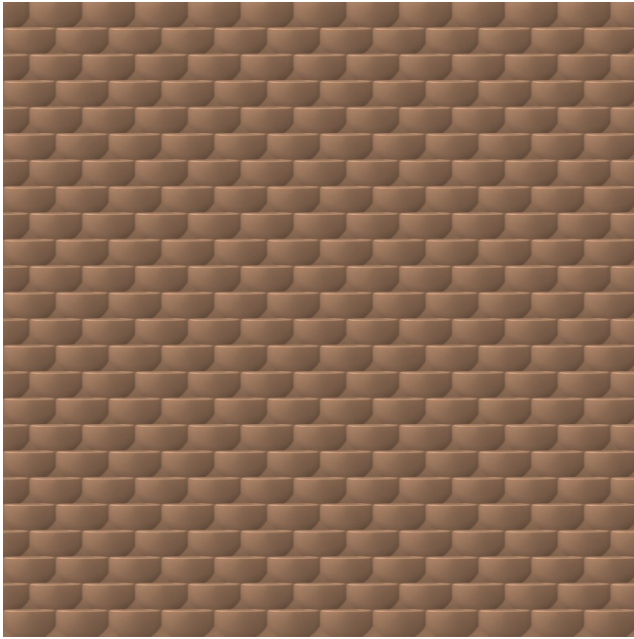

HV-G05

Alternating squares of horizontal and vertical ribs, like a woven basket. Great for headboards and accent walls.

Shown in Baltic birch plywood

Depth 3/16"

Tooling 1/2" ball nose, parallel passes

DIMENSIONAL

Scale

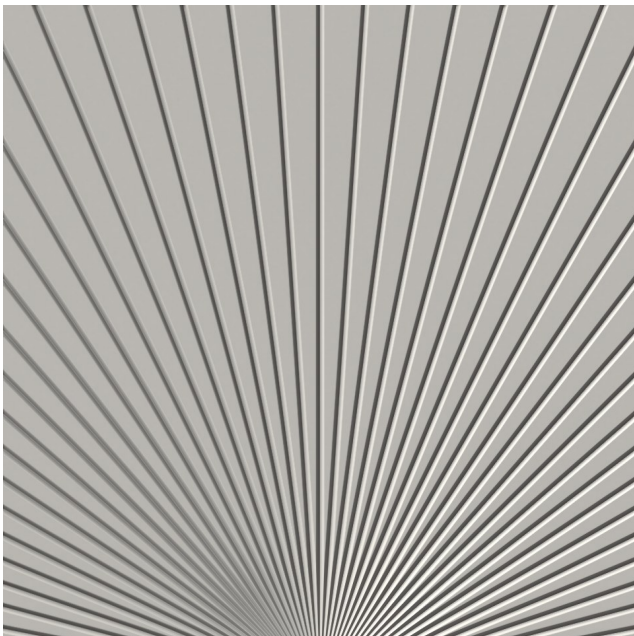

HV-G06

Overlapping scalloped scales, each gently sloped, like shingles or a fish's skin. Beautiful on curved or column surfaces.

Shown in MDF, painted clay

Depth 1/4"

Tooling 1/2" ball nose, 3D finishing pass

DIMENSIONAL

Sunburst

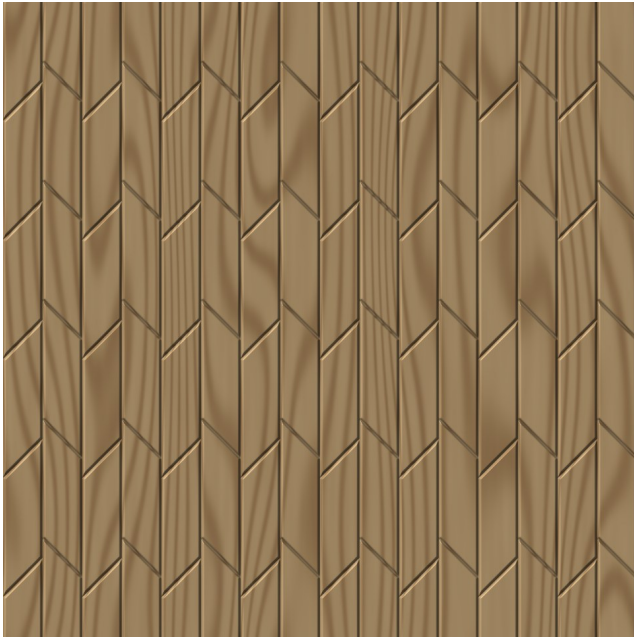

HV-G07

Rays fanning out from a low center point, cut entirely with a V-bit. Mid-century energy for entries and headboards.

Shown in Paint-grade MDF, primed white

Depth 3/16"

Tooling 60° V-bit, V-carve

DIMENSIONAL

Herringbone

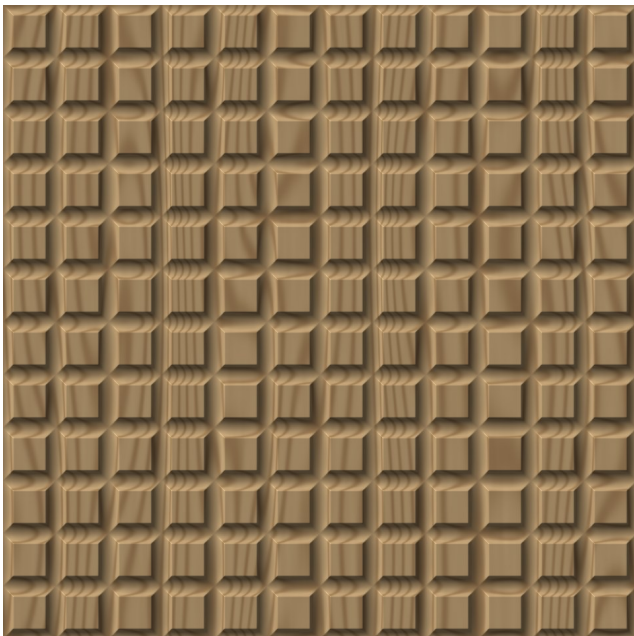

HV-G08

The classic herringbone floor pattern, V-grooved into a single panel. Looks like dozens of pieces, installs like one.

Shown in White oak

Depth 1/8"

Tooling 90° V-bit, V-carve

DIMENSIONAL

Waffle

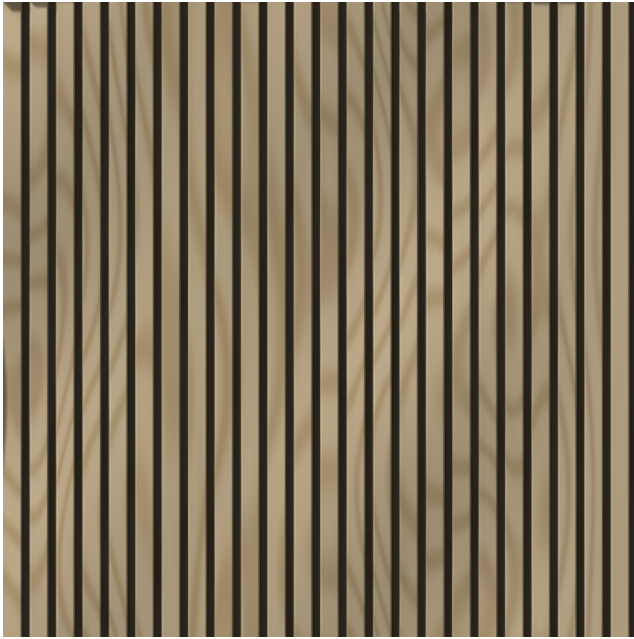

HV-G09

Soft pillowed squares separated by rounded channels, like a waffle or tufted upholstery. Warm and tactile.

Shown in White oak

Depth 1/4"

Tooling 1/2" ball nose, grid passes

PARAMETRIC

Fin Wall

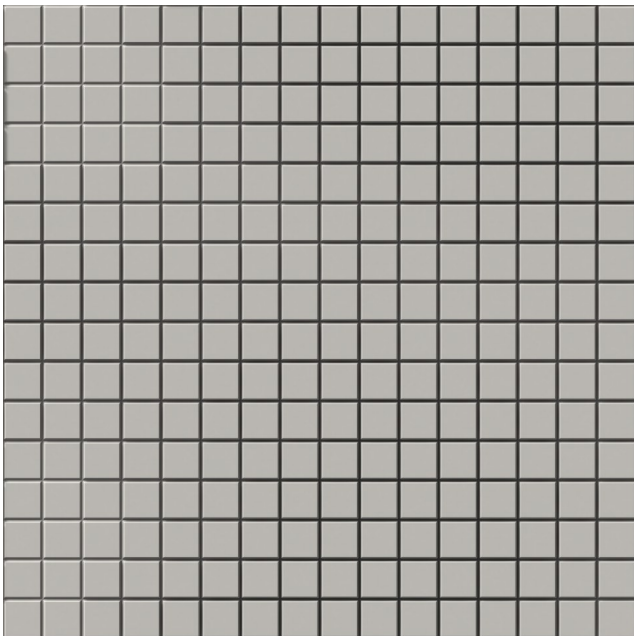

HV-P01

Parallel plywood fins whose outer edge follows a flowing curve. Built from stacked, CNC-profiled sheets, with no two fins alike.

Shown in Baltic birch plywood

Depth fins 1" to 4" deep

Tooling Profile-cut plywood fins, assembled on a backer

PARAMETRIC

Pixel

HV-P02

A field of square blocks stepped to five depths, driven by a smooth gradient, like a digital landscape. Flat pockets only, so it's fast to cut.

Shown in Paint-grade MDF, primed white

Depth 5 steps to 1/2"

Tooling 1/4" end mill, stepped pockets

PARAMETRIC

Contour Stack

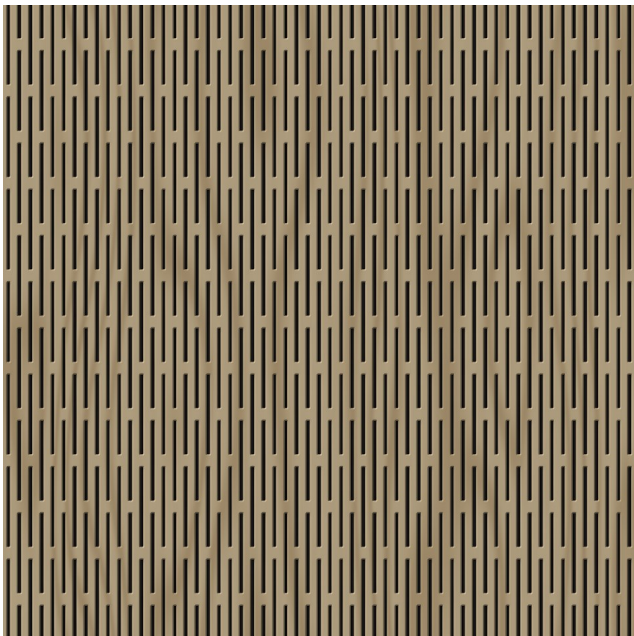

HV-P03

Stacked plywood layers, each profiled to a slice of a 3D form, so the exposed ply edges draw natural contour lines.

Shown in Baltic birch plywood

Depth custom: 1" to 6"+

Tooling Profile-cut plywood layers, laminated

FLEXIBLE PANELS

Flex Kerf

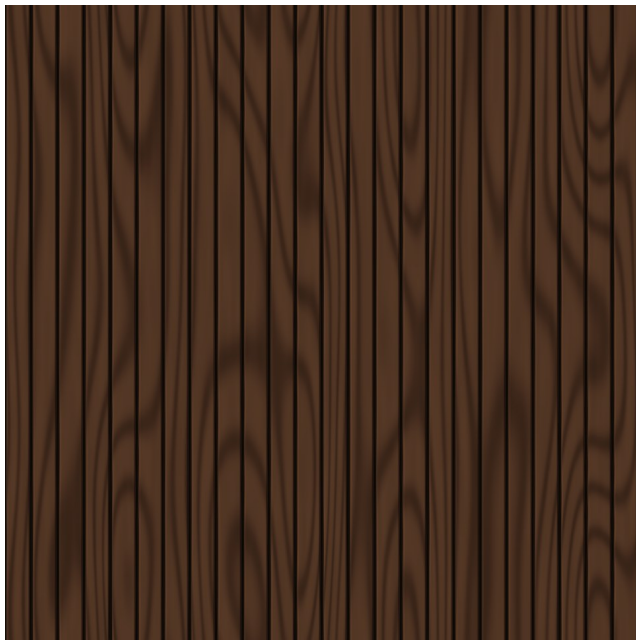

HV-X01

Staggered through-slits (a "living hinge") let a flat sheet of plywood bend smoothly around columns, curved walls and reception desks.

Shown in Baltic birch plywood

Depth 1/4" to 1/2" plywood

Tooling 1/8" end mill, through slits

FLEXIBLE PANELS

Tambour

HV-X02

Solid slats cut almost through, leaving a thin flexible skin (or mounted on fabric), so the panel wraps curves like a roll-top desk.

Shown in Walnut veneer / solid walnut

Depth 3/4" slats

Tooling Kerf-cut slats or slats on fabric backer

FLEXIBLE PANELS

Flex Lattice

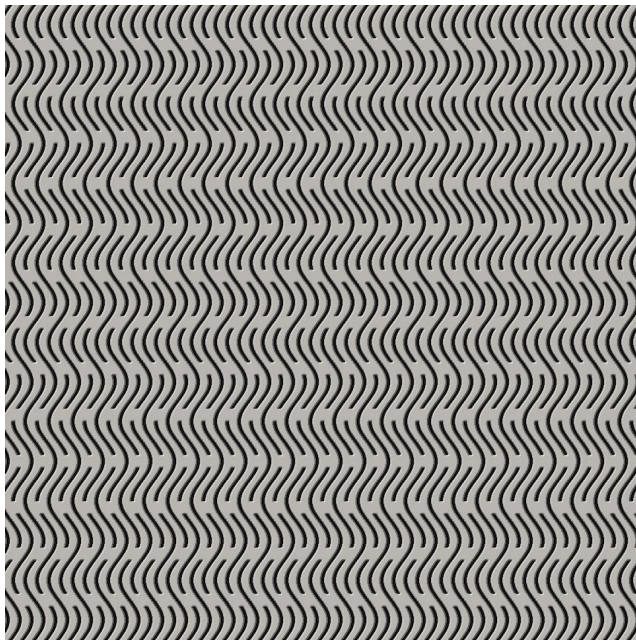

HV-X03

A zig-zag lattice screen cut from thin stock that flexes into curves. Popular for curved partitions, pendant shades and ceilings.

Shown in MDF, matte black finish

Depth 1/4" to 1/2" panel

Tooling 1/8" end mill, through cut

FLEXIBLE PANELS

Flex Wave

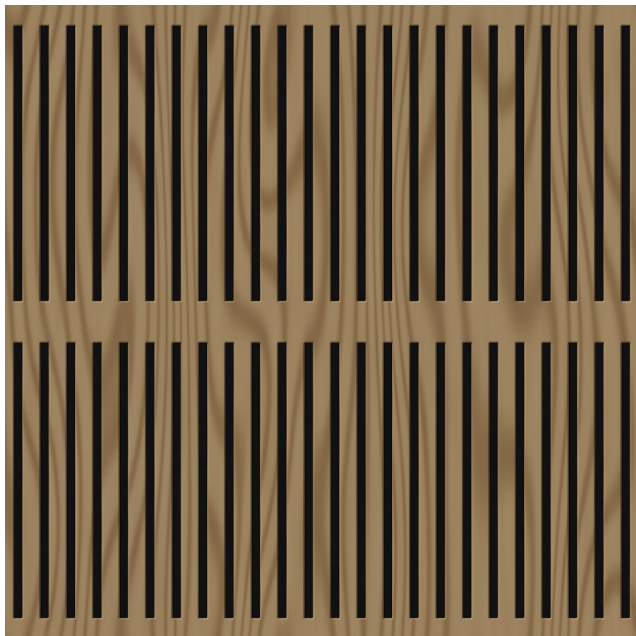

HV-X04

Wavy S-shaped kerf slits that bend in two directions, ideal for curved bar fronts, columns and backlit features.

Shown in Paint-grade MDF, primed white

Depth 1/4" to 1/2" panel

Tooling 1/8" end mill, through slits

SLOTTED & ACOUSTIC

Linear Slot

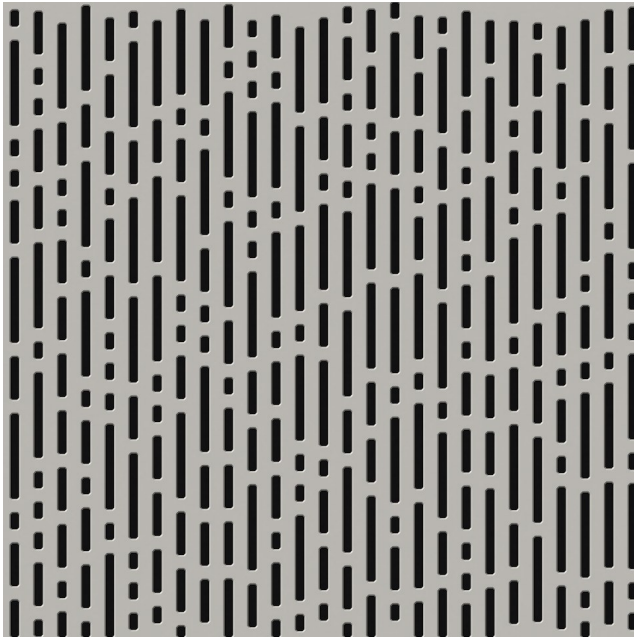

HV-A01

Through-cut vertical slots backed with black acoustic felt. Absorbs sound while giving a clean, linear look.

Shown in White oak

Depth 3/4" thick panel

Tooling 1/4" compression bit, through cut

SLOTTED & ACOUSTIC

Morse

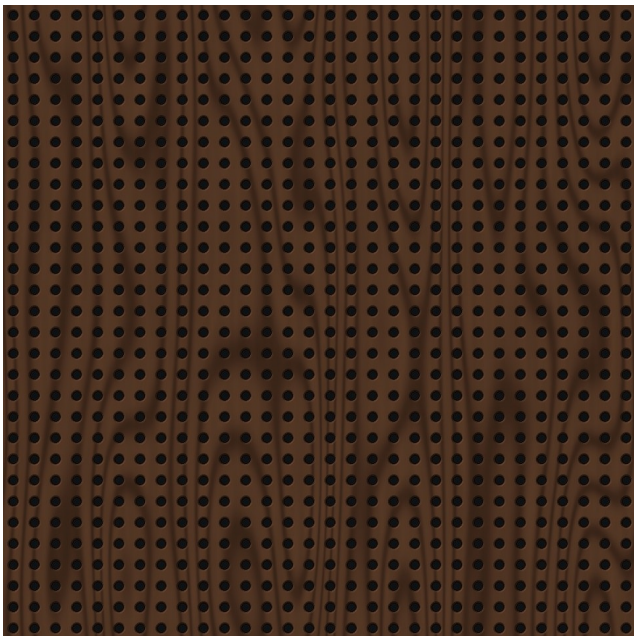

HV-A02

Slots of varying lengths set in rhythmic columns, like code, cut through and backed with felt for sound control.

Shown in Paint-grade MDF, primed white

Depth 3/4" thick panel

Tooling 1/4" compression bit, through cut

SLOTTED & ACOUSTIC

Perf Grid

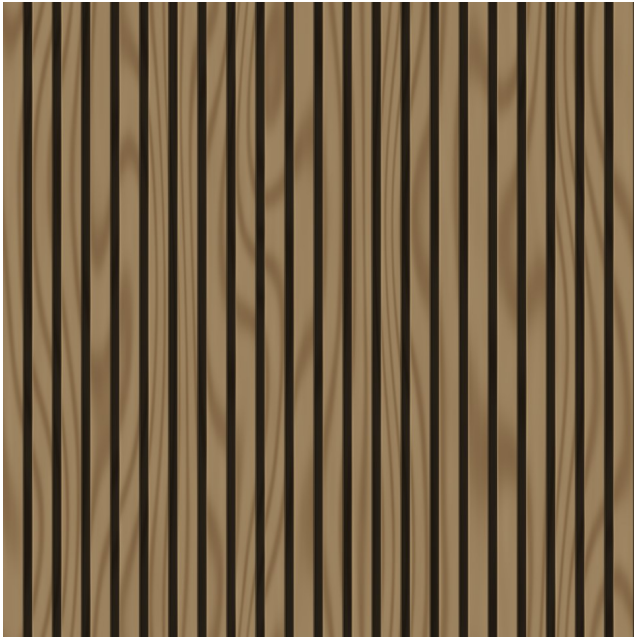

HV-A03

A precise grid of drilled holes with an acoustic backer. Quiet, minimal and highly effective in offices and restaurants.

Shown in Walnut veneer / solid walnut

Depth 3/4" thick panel

Tooling 3/8" drill / spiral bit, drilled pattern

SLOTTED & ACOUSTIC

Slat Acoustic

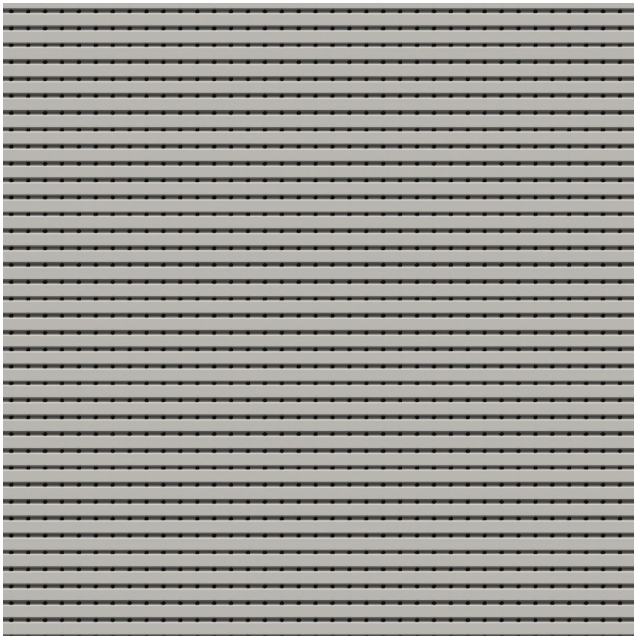

HV-A04

The classic acoustic slat wall: wood slats on black acoustic felt. Warm, modern and very effective at taming echo.

Shown in White oak

Depth 3/4" slats on 3/8" felt

Tooling Ripped / CNC-cut slats on PET felt backer

SLOTTED & ACOUSTIC

Groove & Perf

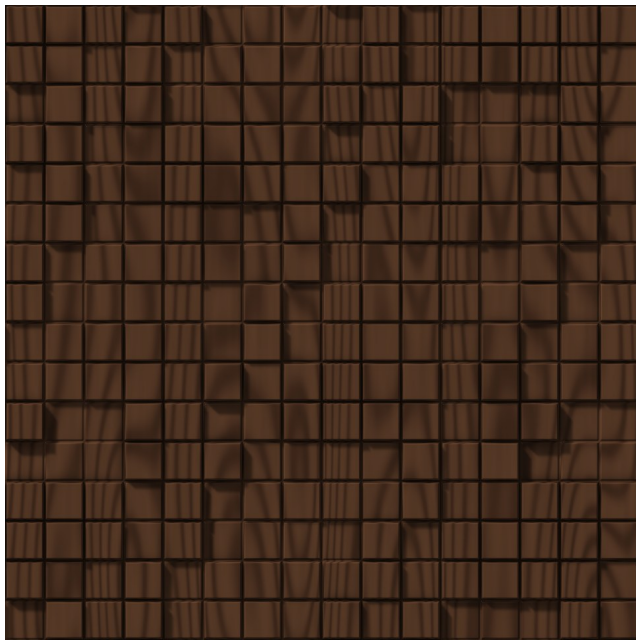

HV-A05

Fine horizontal grooves with hidden holes behind, the look of commercial acoustic panels used in auditoriums and boardrooms.

Shown in Paint-grade MDF, primed white

Depth 3/4" panel

Tooling 1/8" end mill grooves + drilled back holes

SLOTTED & ACOUSTIC

Skyline Diffuser

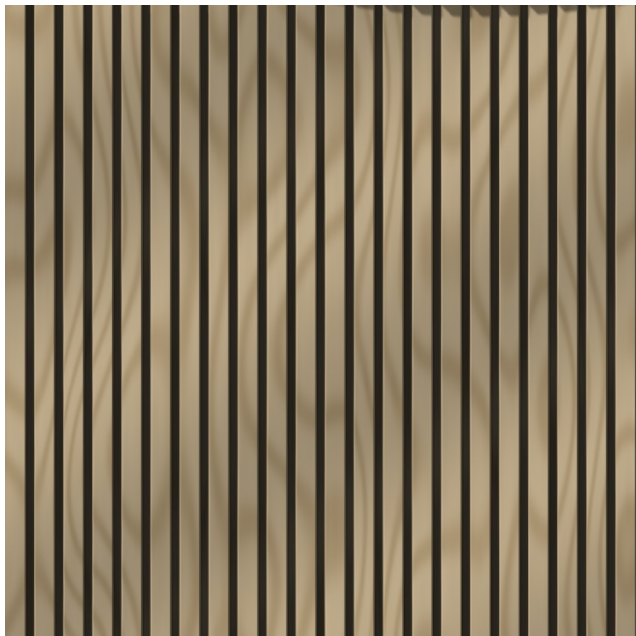

HV-A06

A 2D sound diffuser: a grid of blocks at varying depths that scatters sound evenly. A favorite in studios, theaters and listening rooms.

Shown in Walnut veneer / solid walnut

Depth up to 2" (thick stock or laminated)

Tooling 1/2" end mill, stepped pockets

SLOTTED & ACOUSTIC

Wave Slat

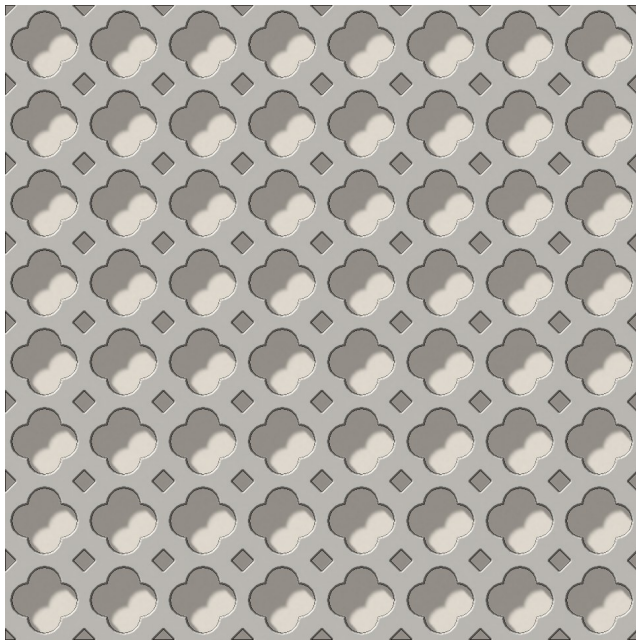

HV-A07

Acoustic slats whose faces are carved to a flowing wave, so the whole wall moves while still absorbing sound.

Shown in Baltic birch plywood

Depth 3/4" to 1-1/2" slats

Tooling Slats 3D-carved on the face, on felt backer

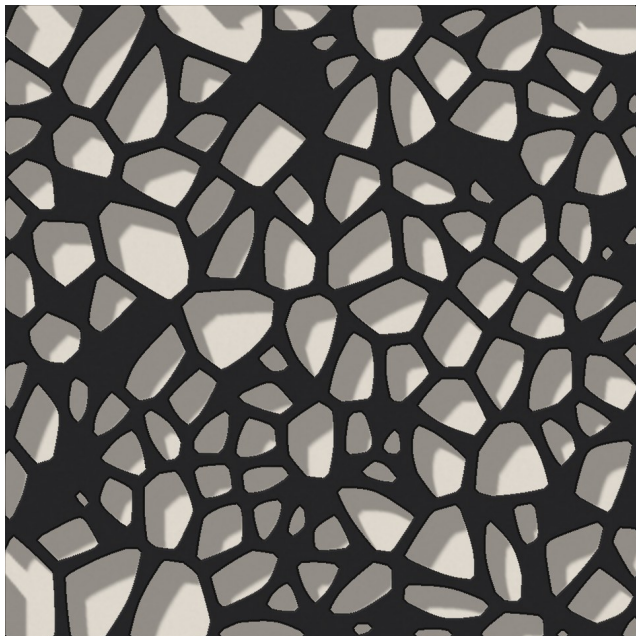

DECORATIVE SCREENS

Quatrefoil

HV-S01

A classic interlocking four-lobed pattern cut through. Works as room dividers, radiator covers and window screens.

Shown in	Paint-grade MDF, primed white
Depth	1/2" to 3/4" panel
Tooling	1/4" compression bit, through cut

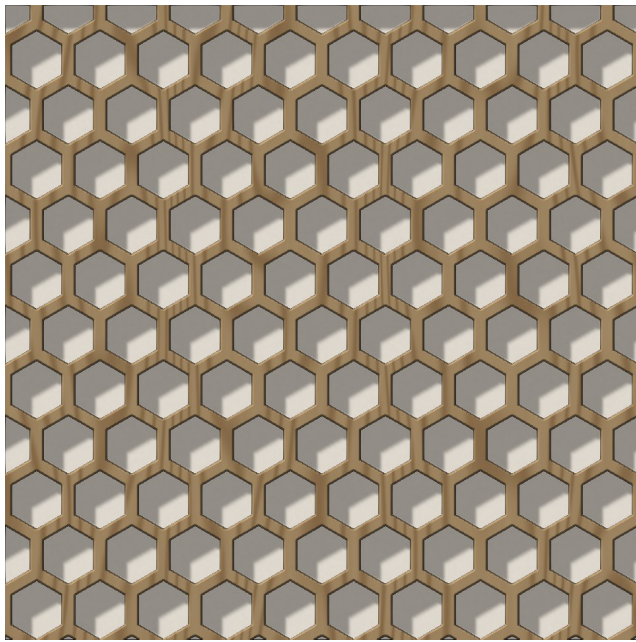

DECORATIVE SCREENS

Cellular

HV-S02

Organic Voronoi cells with rounded openings, like leaf veins or dried earth. Striking backlit or against a light wall.

Shown in	MDF, matte black finish
Depth	1/2" to 3/4" panel
Tooling	1/4" compression bit, through cut

DECORATIVE SCREENS

Honeycomb

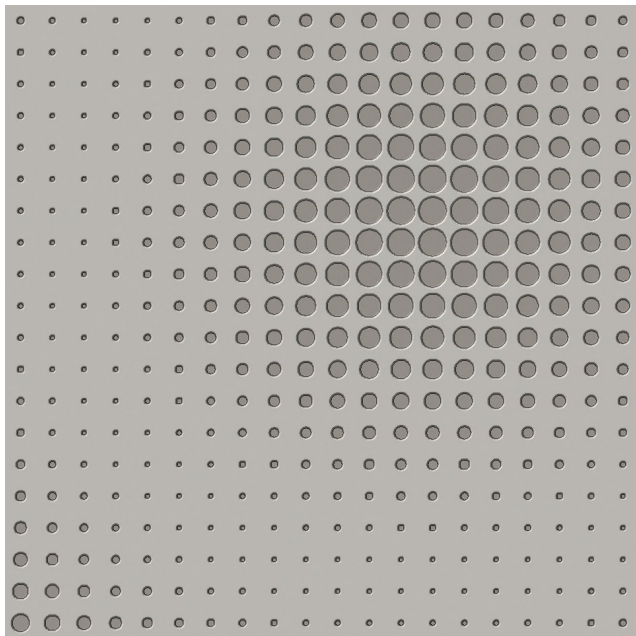

HV-S03

Clean hexagonal openings with an even web. Strong, lightweight and easy to scale for ceilings and partitions.

Shown in White oak

Depth 1/2" to 3/4" panel

Tooling 1/4" compression bit, through cut

DECORATIVE SCREENS

Halftone

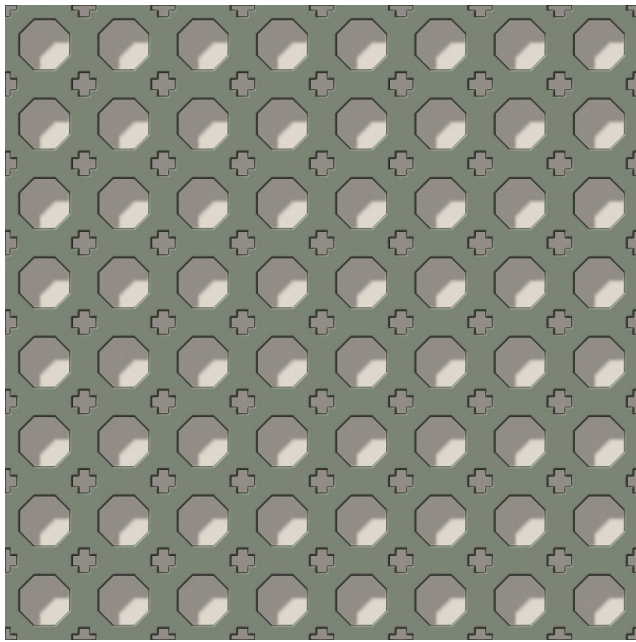

HV-S04

Circles that grow and shrink across the panel to create a gradient, like a printed photo. Can be customized to any image or logo.

Shown in Paint-grade MDF, primed white

Depth 1/2" to 3/4" panel

Tooling Drilled + 1/4" bit circle pockets, through cut

DECORATIVE SCREENS

Kasbah

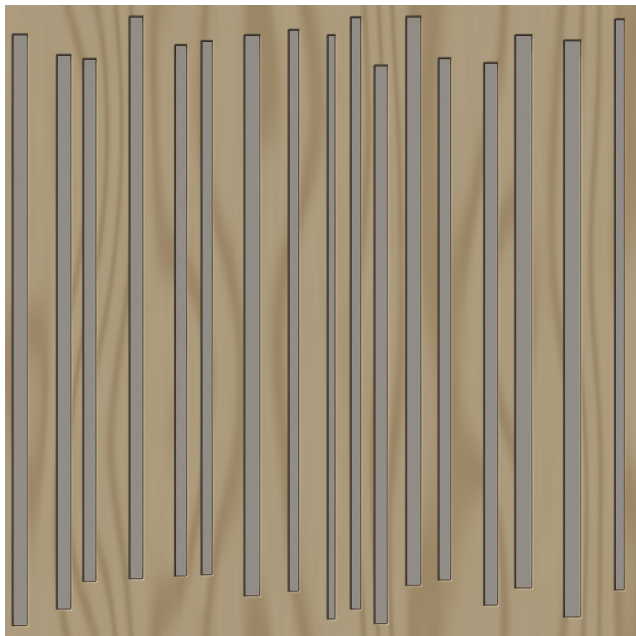

HV-S05

Eight-point stars and crosses inspired by traditional geometric tile. Rich in pattern yet simple to cut.

Shown in MDF, painted sage

Depth 1/2" to 3/4" panel

Tooling 1/4" compression bit, through cut

DECORATIVE SCREENS

Birch Stand

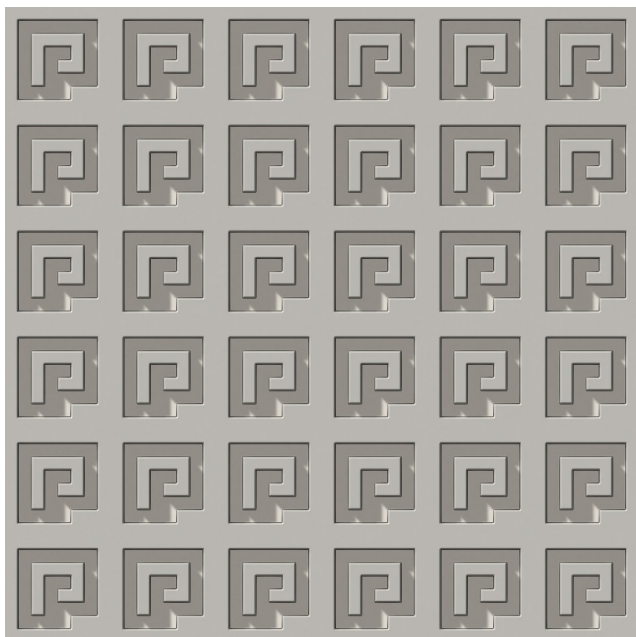

HV-S06

Vertical slats of random widths, like a stand of young trees. A soft, natural divider that still lets light through.

Shown in Baltic birch plywood

Depth 3/4" panel

Tooling 1/4" compression bit, through cut

DECORATIVE SCREENS

Greek Key

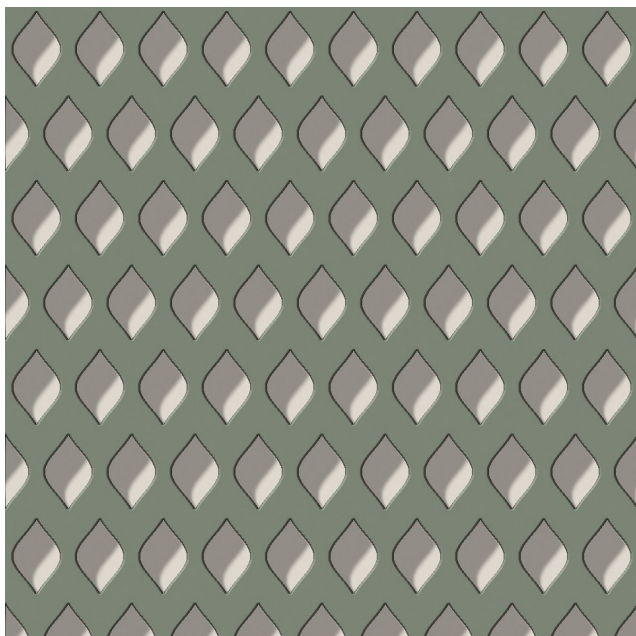

HV-S07

The timeless meander border, repeated as an all-over screen. Classic, orderly and endlessly adaptable.

Shown in Paint-grade MDF, primed white

Depth 1/2" to 3/4" panel

Tooling 1/4" compression bit, through cut

DECORATIVE SCREENS

Petal

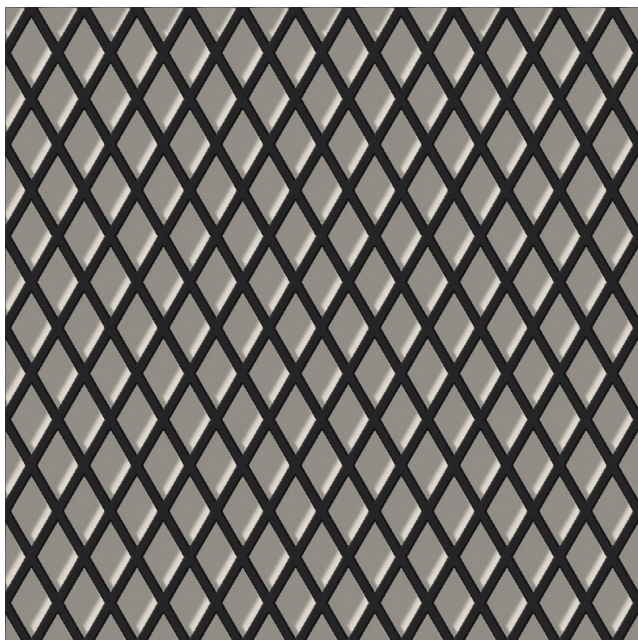

HV-S08

Pointed ogee (petal) openings in a staggered repeat. Elegant for room dividers, cabinet inserts and backlit walls.

Shown in MDF, painted sage

Depth 1/2" to 3/4" panel

Tooling 1/4" compression bit, through cut

DECORATIVE SCREENS

Prism

HV-S09

Triangular openings in a clean geometric grid. Modern, graphic and strong, great for facades and fences in HDPE or aluminum.

Shown in MDF, matte black finish

Depth 1/2" to 3/4" panel

Tooling 1/4" compression bit, through cut

DECORATIVE SCREENS

Canopy

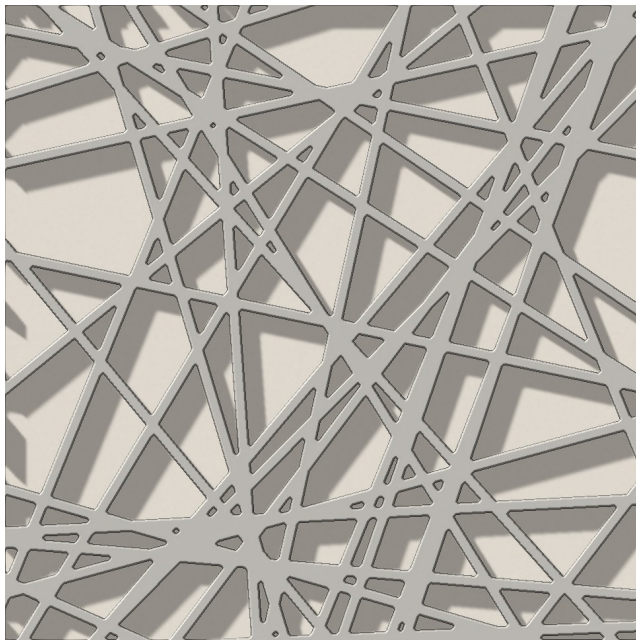

HV-S10

Scattered leaf-shaped openings that cast dappled light like a tree canopy. Beautiful as a screen, gate insert or ceiling feature.

Shown in White oak

Depth 1/2" to 3/4" panel

Tooling 1/4" compression bit, through cut

DECORATIVE SCREENS

Ice Ray

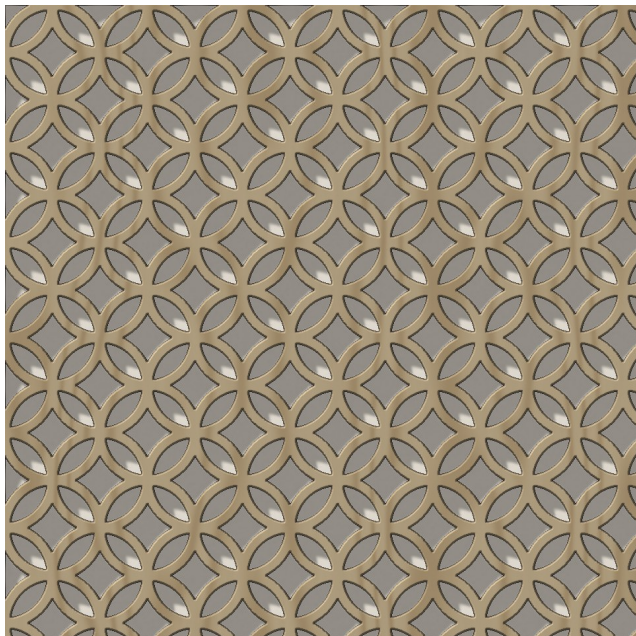

HV-S11

A traditional Chinese "cracked ice" lattice of irregular straight-sided openings. Every section is unique.

Shown in Paint-grade MDF, primed white

Depth 1/2" to 3/4" panel

Tooling 1/4" compression bit, through cut

DECORATIVE SCREENS

Rings

HV-S12

Overlapping circles form a flowing chain-link pattern of petals and rings. Soft geometry that suits homes and hospitality.

Shown in Baltic birch plywood

Depth 1/2" to 3/4" panel

Tooling 1/4" compression bit, through cut

Custom designs welcome

These designs are a starting point. We can create a pattern from your sketch, logo, photo or brand, make it deeper or subtler, change the spacing, or combine designs. We also cut matching trim, reception desk fronts, bar dies, ceiling features, room dividers and signage so the whole space ties together.

We cut the panels on our industrial router: 5' × 10' vacuum bed, a 12-tool automatic tool changer, a rotary 4th axis, and hundreds of tools in stock, including PCD tooling for clean edges in MDF, plywood and laminates.
